Ultradcompact®

O que é?

Inspirado no tradicional e bellissimo design italiano, o *Altracompact* é uma superfície produzida e montada através de uma tecnologia inovadora.

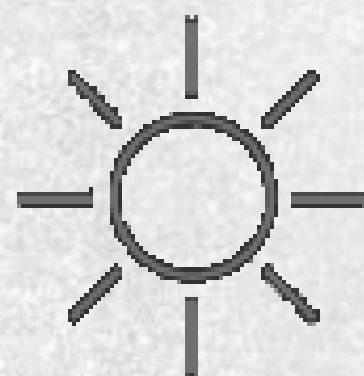

Ponto chave:

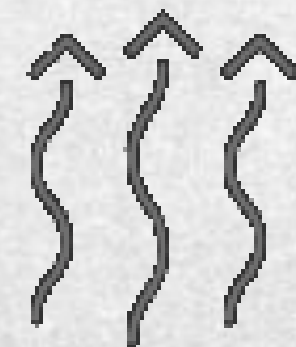

O ponto chave deste material é a sua durabilidade; é resistente ao fogo e a altas temperaturas.

Produto de fácil limpeza.

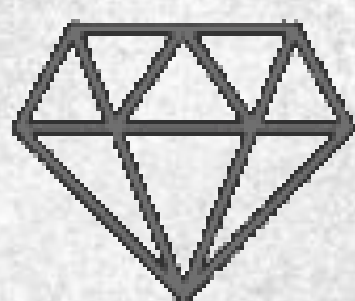

Impermeável, natural e totalmente reciclável.

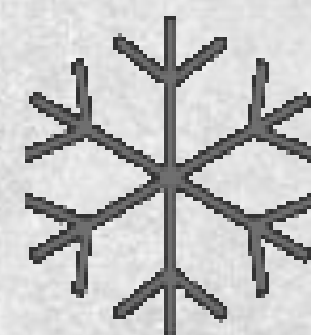

Resistência
Luz UV

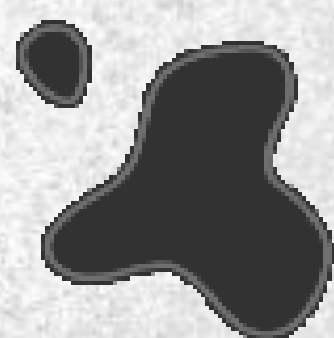

Resistente a
Fogo e calor

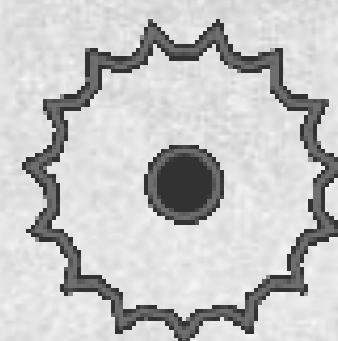

Resistência
a arranhões

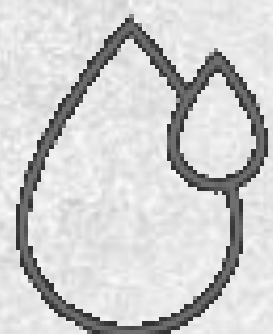

Resistente
ao congelamento

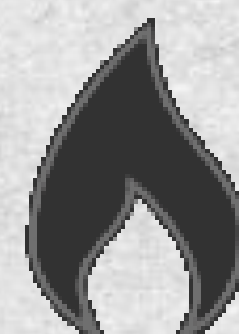

Resistência
a manchas

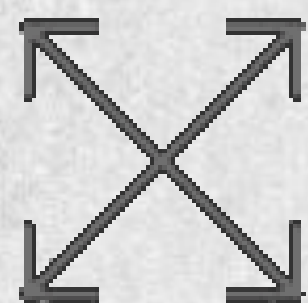

Resistente
à abrasão

Baixa Absorção
de Água

Material à
prova de fogo

Estabilidade
dimensional

Tecnologia TSP

O Ultracompact é fabricado por meio de uma tecnologia chamada TSP – Tecnologia de Sinterização de Partículas. Este processo é responsável pela sinterização do produto de forma original, sendo este um dos procedimentos mais inovadores da indústria atualmente.

Fachadas

O Ultracompact é altamente recomendado para projetos de fachadas ventiladas, pois suas conexões mecânicas entre o material de revestimento e a estrutura criam uma superfície segura e firme.

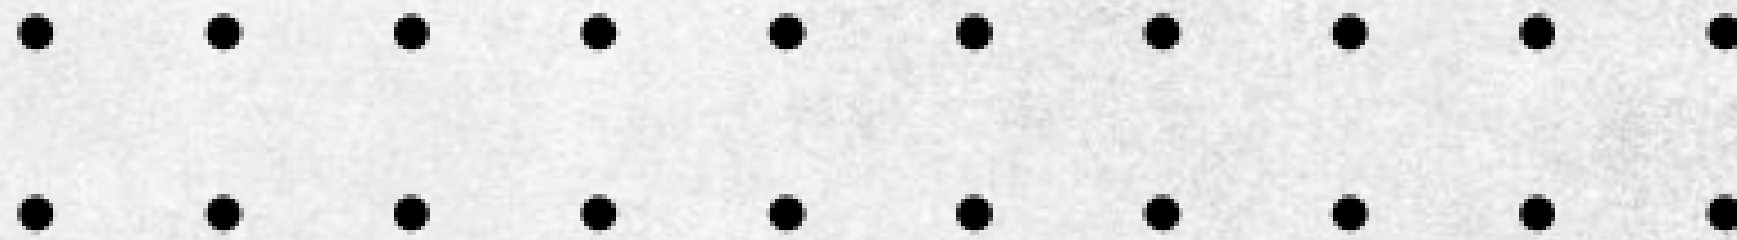

Resistência

O inovador processo de produção possibilita ao Ultracompact propriedades que o tornam uma das superfícies mais resistentes disponíveis no mercado atual. Ideal para aplicação em cozinhas e restaurantes resiste até 700° C de calor.

Versatilidade

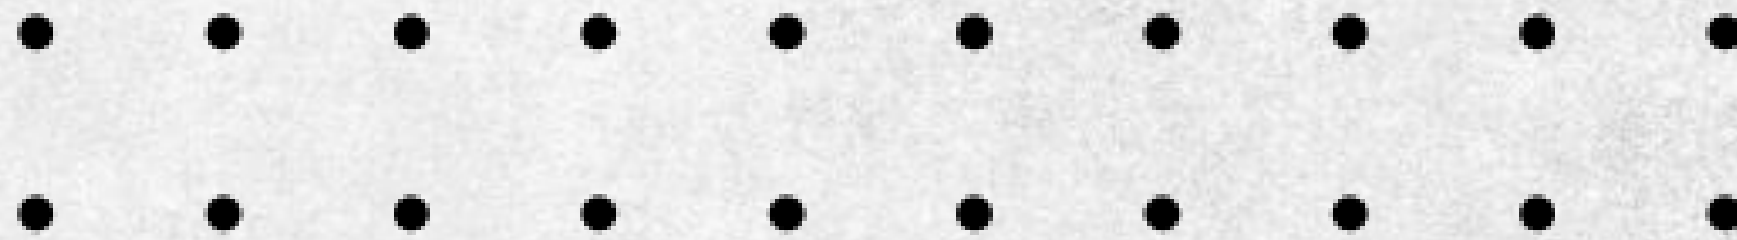

Disponível em diferentes espessuras, o Ultracompact proporciona grande flexibilidade de uso e uma ampla liberdade criativa para todo e qualquer projeto. Além disso, a utilização do Ultracompact garante maior higiene e durabilidade, pois o produto tem zero absorção de líquidos.

santamargherita

O que é?

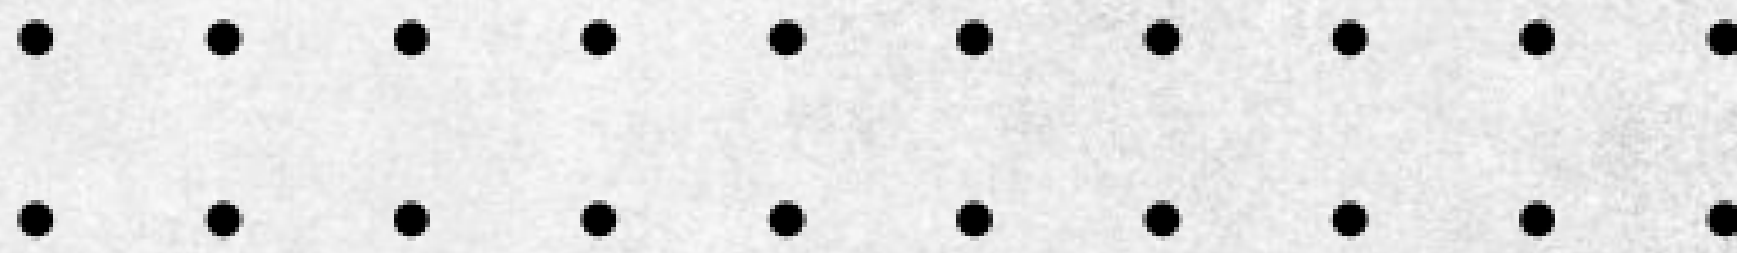

Grânulos dos mármoreos mais preciosos de vários tamanhos, consistências e cores são misturados

profissionalmente com resinas de alta qualidade,

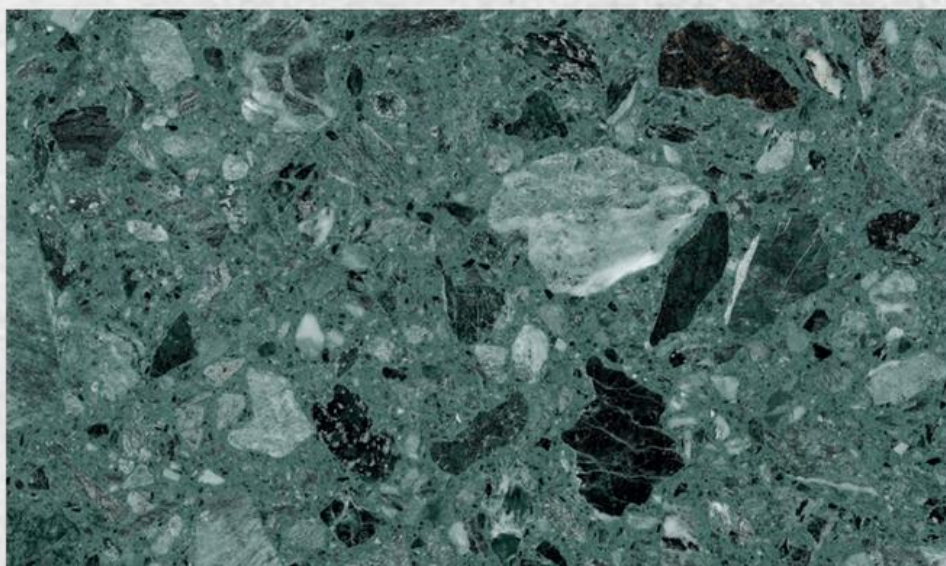

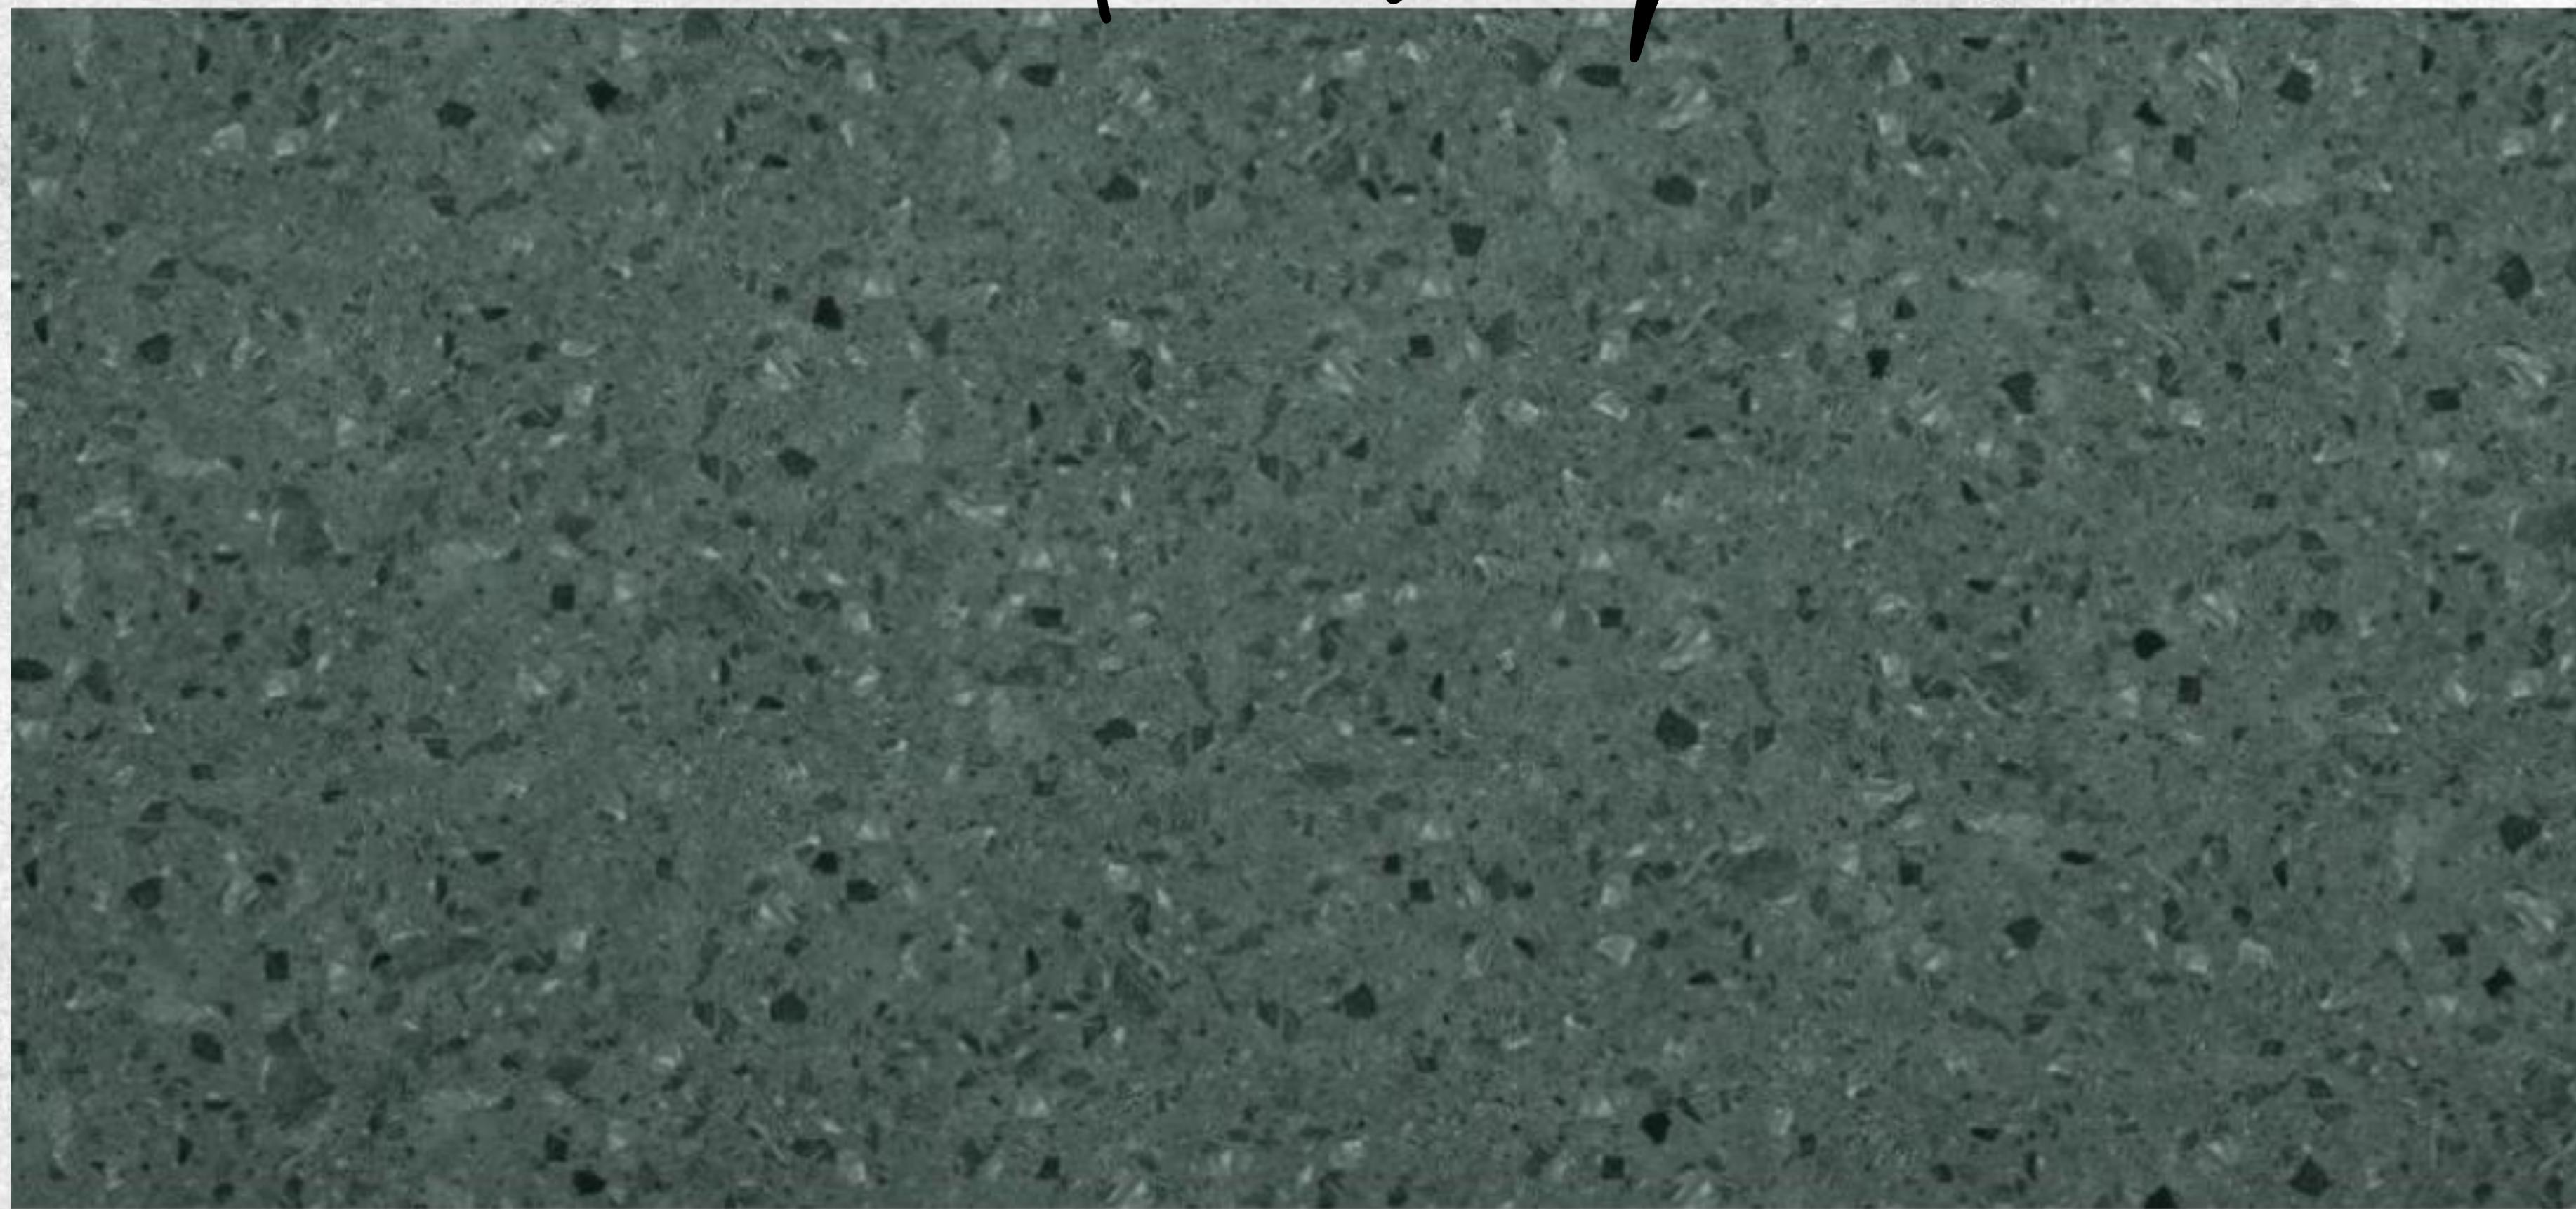

certificadas e testadas para uso interno.

O resultado é uma superfície maravilhosa, versátil e

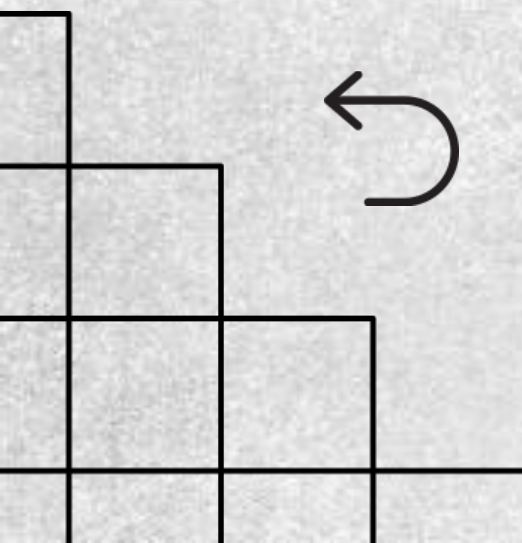

tecnologicamente avançada.
